Customer Overview

My Business Account is organized in easy-to-use "tabs". Once enrolled, you simply click on the tab based on what you need to accomplish. My Business Account offers the following tools:

Access Online Statements

The Statements tab provides a quick, easy method for customers to review their balance, last payment and a summary of current charges. In addition, customers can view usage and charges related to their entire business or a particular account. From the statements page, customers can easily view or print their bill in several flexible formats. They can also view unbilled voice, data and text message usage. Statements can be viewed up to 6 months in the past.

Make Payments Online

The Payments tab allows businesses to apply payments to their account(s). Customers can use checking or savings accounts for a one-time payment. For recurring payments, a credit/debit card or a business checking or savings account can be used. The payments tab can also send e-mail notifications to customers if a payment is reversed or declined.

Manage Accounts

Customers can manage account activity on-line through the Account Maintenance tab. This tab offers a range of functionality such as updating account information, changing a voice mail password, completing a local telephone number change or checking the status of a port. Additionally, customers can make ESN changes online and initiate device upgrades from this tab.

Use Robust Reporting Tools

Reports - The Reports tab offers customers the ability to pull data based on usage or cost. For example, a customer can view the "20 longest phone calls" or a "summary of cost by month". Additionally, customers can pull a summary usage report that includes usage statistics at the mobile telephone number (MTN) level. They can receive usage details for such things as peak, off-peak and nights and weekends. Reports help customers manage their account and make informed decisions about their service.

Analytics - The Analytics tab provides a series of robust reports and analysis tools. Customers can choose standardized or customized report options. They can apply filters to create customized views of wireless usage and costs. This tab enables customers to run reports against multiple Verizon Wireless billing accounts in a single report.

Order New Devices

Customers can use the Shop VZW link to order new devices and accessories when logged in to My Business Account. The ordering site is customized with a customer's name and corresponds to a customer's pricing & equipment discount. This provides great flexibility for customers to place orders right from their own desktop via a single login. This option is available when eligibility requirements are met.

Additional Items

Obtain Online Support - The Support tab is a tool for customers to help them learn how to use My Business Account and find answers to frequently asked questions. This tab provides How-to-use-Guides to help educate customers on using the application.

Perform Administrative Functions

- **Administration** - The Administration tab allows the company point of contact to perform several useful functions that help manage their account. From the Administration tab, users can view their company profile, manage billing accounts, create corporate or personal address books, go paperless and create business structures.
- **More About Company Structures** - A Company Structure is a customized hierarchical view of billing information. Company Structures are created by the customer directly in My Business Account. Company Structures allow the customer to organize their billing accounts by department, geographic territory, or in whatever way best meets the needs. By doing so, users will be able to see a cost summary for a given structure. For example, a customer may have 50 wireless numbers and 10 billing account numbers. The point of contact could create a company structure containing folders for the Marketing department, another for Finance and another for Sales.
